Corrigendum

Specific binding of normal prion protein to the scrapie form via a localized domain initiates its conversion to the protease-resistant state

Motohiro Horiuchi and Byron Caughey

The EMBO Journal, 18, 3193–3203, 1999

The authors apologize for the omission of Joëlle Chabry (present address: IPMC, CNRS 660, Route des Lucioles, F-06560 Valbonne, France) as a co-author on the above paper. The order of authors should read Motohiro Horiuchi, Joëlle Chabry and Byron Caughey.

Corrigendum

M(φ)BssHII, a novel cytosine-C5-DNA-methyltransferase with target-recognizing domains at separated locations of the enzyme

S.Sethmann, P.Ceglowski, J.Willert, R.Iwanicka-Nowicka, T.A.Trautner and J.Walter

The EMBO Journal, 18, 3502–3508, 1999

The authors apologize for the mislabelling of bands in Figure 2A. The figure is shown correctly below.

Fig. 2. Identification and methylation potential of M(φ)BssHII isoforms. (A) Western blot of protein extracts from E.coli cells expressing M(φ)BssHII. Left lane: the two isoforms cross-reacting with a polyclonal M(φ)BssHII antibody. Right lane: molecular weight standard.
