Supplementary Figure S1. *Lpar1* is significantly up-regulated during hemamtopoiesis. (A–C) qPCR analyses of *lpar1* (A), *lpar3* (B), and *atx* (C) expressions during mESC hematopoietic differentiation. (D–F) qPCR analyses of *lpar1* (D), *lpar3* (E), and *atx* (F) expressions during zebrafish embryogenesis. Data shown are means ± s.e.m., n=3.
