Supplementary Figure S9. Morpholinos specificity analysis. (A-D) Lpar1-EGFP mRNA including MO target sequence was injected with 6 ng Ctrl MO (A and B) or Lpar1 MO (C and D) at one-cell stage. (E-H) Atx-EGFP mRNA was injected with 0.5 ng Ctrl MO (E and F) or Atx MO (G and H) at one-cell stage. A, C, E and G, Brightfield pictures. B, D, F and H, Fluorescent pictures. The data were taken at 24 hpf.
