Supplementary Material 7 Contribution of different kinetic components to the $\Delta C_m$ response upon $\text{Ca}^{2+}$-uncaging

Figure S7. Contribution of different kinetic components to the $\Delta C_m$ response upon $\text{Ca}^{2+}$-uncaging.

Quantification of the contributions of the kinetic components to the $\Delta C_m$ (left) and the amplitudes of kinetic components of the $\Delta C_m$ (right) triggered by UV-laser $\text{Ca}^{2+}$ uncaging, as estimated by fitting double or single exponential functions to the $\Delta C_m$ traces.
