The membrane was co-incubated with anti-tubulin and anti-ERK antibody.
Figure 6c

The membrane was co-incubated with anti-eIF4A and anti-tubulin antibody.
The membrane was co-incubated with anti-S6K, anti-tubulin and anti-eIF4A and antibody. Different exposures were used for the figure.
Figure 6e

The membrane was co-incubated with anti-pS6K (T389), anti-tubulin antibody and anti-ERK antibody. Different exposures were used for the figure.

"The membrane was co-incubated with anti-pS6K (T389), anti-tubulin antibody and anti-ERK antibody. Different exposures were used for the figure."
